Dear Crafter,

One of the greatest inspirations for stitching is the living beauty of Nature herself: The resplendent orchard in spring, the glorious bouquets of summer, the ripe bounty of the fall harvest—these are some of the sublime visions that the artist, Marie Barber, has captured in *An American Sampler: Gifts of Nature.*

As the seventh annual volume in our series of distinctive cross-stitch books, *Gifts of Nature* is a special pleasure to bring to our readers, whether those familiar with or just discovering these exquisite titles.

To complement each beautiful design, we have presented the projects—which range from grand, gorgeous framed works to petite, pretty "weekenders"—in captivating photographs, with clear directions and easy-to-read charts. There's even a section on stitching basics—a primer for beginners or "refresher" for the more experienced.

Nature's gifts of blue skies and floral vistas are perhaps the most wondrous of all. We hope that you will find just a hint of Her breathtaking splendor in the samplers and gifts you create from these pages.

Enjoy,

Ruth A. Weadock

Wreath

Stitched on Perforated Plastic over one mesh, the finished design size is 2½" x 2⅛" for lettuce, 2⅝" x 2¾" for cauliflower, 2⅝" x 2⅛" for cabbage, 1½" x 2¾" for carrot, 1⅜" x 1¾" for radish, 1⅛" x 1⅛" for the first apple (see bottom row of sampler on page 123), 1¼" x 1⅛" for the third apple, 1⅜" x 1⅛" for the fourth apple. The plastic was cut 6" x 6" for each design. Place stitched design pieces as desired on purchased wreath. The fruit and vegetable designs are taken from the graphs on pages 124-135.

Recipe Box

Stitched on platinum Belfast Linen 32 over two threads, the finished design size is 9½" x 2". The fabric was cut 16" x 8". The design is the plum garland at the top of the sampler and is taken from the graphs on pages 124, 128, and 132. Paint box if desired, then follow manufacturer's instructions for inserting stitching. See page 143 for supplier.

FABRICS	DESIGN SIZES

CROSS-STITCH TIPS

FABRICS: Counted cross-stitch is usually worked on even-weave fabric. These fabrics are manufactured specifically for counted-thread embroidery and are woven with the same number of vertical as horizontal threads per inch. Because the number of threads in the fabric is equal in each direction, each stitch will be square. It is the number of threads per inch in even-weave fabrics that determines the size of a finished design.

WASTE CANVAS: Waste Canvas is a loosely woven fabric used as a guide for cross-stitching on fabrics other than even-weaves. Cut the waste canvas 1" larger on all sides than the finished design size. Baste it to the fabric to be stitched. Complete the stitching. Then, dampen the stitched area with cold water. Pull out the waste canvas threads one at a time with tweezers. It is easier to pull all the threads running in one direction first, then pull out the opposite threads. Allow the stitching to dry. Place face down on a towel and iron.

PREPARING FABRIC: Cut even-weave fabric at least 3" larger on all sides than the design size. A 3" margin is the minimum amount of space that allows for comfortably working the edges of the design. To prevent fraying, whipstitch or machine-zigzag raw fabric edges.

NEEDLES: Needles should slip easily through the holes in the fabric but not pierce the threads. Use a blunt tapestry needle, size 24 or 26. Never leave the needle in the design area of your work. It can leave rust or a permanent impression on the fabric.

FLOSS: Cut the floss into 18" lengths. Run the floss over a damp sponge to straighten. Separate all six strands and use the number of strands called for in the code.

CENTERING THE DESIGN: Fold the fabric in half horizontally, then vertically. Place a pin in the fold point to mark the center. Locate the center of the design on the graph by following the vertical and horizontal arrows on the top, bottom, and sides of the graph. Begin stitching all designs at the center points of the graph and the fabric.

GRAPHS: Each symbol, or colored symbol, represents a different floss color. Make one stitch for each symbol, referring to the code to verify which stitch to use. Use the small arrows on the top, bottom, and sides of the graph to find the center. When a graph is continued, the two rows on the bottom or side of the graph on the previous page are repeated, separated by a small space, indicating where to connect them. The stitch count is printed with each graph, listing first the width, then the length of the design.

CODES: The code indicates the brand of floss used to stitch the model and all floss numbers and color names are cross-referenced between Anchor and DMC brands. The steps in the code identify the stitch to be used and the number of floss strands for that stitch. The symbols match the graph, and give the color number for the thread. A symbol under a diagonal line indicates a half-cross-stitch. Blended threads are represented on the code and graph with a single symbol, but both color names are listed.

SECURING THE FLOSS: Insert your needle up from the underside of the fabric at your starting point. Hold 1" of thread behind the fabric and stitch over it, securing it with the first few stitches. To finish the thread, run under four or more stitches on the back of the design. Never knot floss unless working on clothing. Another method of securing floss is the waste knot. Knot your floss and insert

your needle from the right side of the fabric about 1" inside the design area. Work several stitches over the thread to secure. Cut off the knot later.

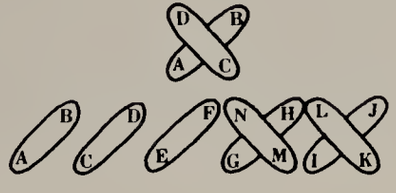
STITCHING: For a smooth cross-stitch, use the "push-and-pull" method. Start by bringing the needle straight up from wrong side of fabric, pulling floss completely through to right side with the exception of the first stitch. Re-insert needle and bring it back straight down, pulling needle and floss completely through to back of fabric. Keep floss flat but do not pull tight. Consistent tension throughout ensures even stitches. Make one stitch for every symbol on the chart. To stitch in rows, work from left to right and then back. Half-crosses are used to make a rounded shape. Make the longer stitch in the direction of the slanted line.

CARRYING FLOSS: To carry floss, weave floss under the previously worked stitches on the back. Do not carry thread across any fabric that is not or will not be stitched. Loose threads, especially dark ones, will show through the fabric.

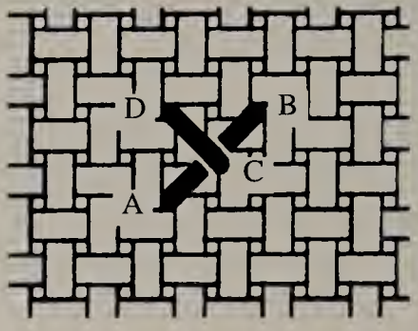
CLEANING COMPLETED WORK: When stitching is complete, soak it in cold water with a mild soap for 5–10 minutes; rinse. Roll in a towel to remove excess water. Do not wring. Place work face down on a dry towel and iron on a warm setting until dry.

STITCHES

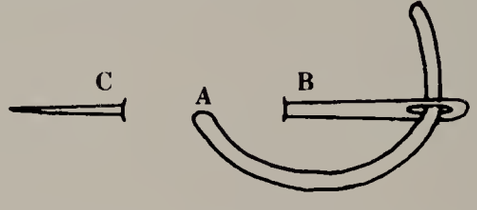
CROSS-STITCH: Make one cross-stitch for each symbol on chart. Bring needle up at A, down at B, up at C, down at D. For rows, stitch across fabric from left to right to make half-crosses and then back to complete stitches. All stitches should lie in the same direction.



HALF-CROSS-STITCH: The stitch actually fits three-fourths of the area. Make the longer stitch in the direction of the slanted line on the graph. Bring needle and thread up at A, down at B, up at C, and down at D.



BACKSTITCH: Working from right to left with one strand of floss (unless designated otherwise on code), bring needle and thread up at A, down at B, and up again at C. Go back down at A and continue in this manner. NOTE: Complete all cross-stitching before working backstitches or other accent stitches.



FRENCH KNOT: Bring the needle up at A, using one strand of embroidery floss. Wrap floss around needle two times. Insert needle beside A, pulling floss until it fits snugly around needle. Pull needle through to back.
